

WARNING.

We wish to caution all users of Simmons Liver Regulator on a subject of the deepest interest and importance to their health. The sole proprietors and makers of Simmons Liver Regulator are the Kansas City World. Christmas has been the season of the year for the sale of the Simmons Liver Regulator. We warn you that customers are often deceived by buying a cheap and inferior medicine of a similar appearance or taste, believing it to be Simmons Liver Regulator. We warn you that the name of the Regulator is on the package or bottle, that it is not Simmons Liver Regulator. No one else makes, or ever has made, Simmons Liver Regulator, or anything called Simmons Liver Regulator, but J. B. Ziehl & Co., and no medicine made by anyone else is the same. We alone can put it up and we cannot be responsible, if other medicines represented as the same do not help you as you are led to expect they will. Bear this fact well in mind, if you have been in the habit of using a medicine which you supposed to be Simmons Liver Regulator, because the name was somewhat like it, and the package did not have the word Regulator on it, you have been imposed upon and have not been taking Simmons Liver Regulator at all. The Regulator has been favorably known for many years, and all who use it know how necessary it is for Fever and Ague, Bilious Fever, Constipation, Headache, Dyspepsia, and all disorders arising from a Dressed Liver.

We ask you to look for yourselves, and see that Simmons Liver Regulator, which you can readily distinguish by the Red Z on wrapper, and by our name, the Red Z on medicine called Simmons Liver Regulator.

Wonderful Work of Bees.—Bees must, in order to collect a pound of clover honey, visit 2,000,000 clover blossoms of their nest. To do this the 62,000 flowers must be visited by an aggregate of 3,750,000 trips from and to the hive. The enormous amount of work here involved precludes the idea of any one bee ever living long enough to gather more than a fraction of a pound of nectarine sweets. As bees are known to fly for miles in quest of suitable fields of operation, it is clear that a single ounce of honey represents millions of miles of travel. It is no wonder that these industrious little insects have earned the reputation of being "busy" bees.

And This Be Prosperity and Plenty.

When David Skinner, a boy convicted in the Madison circuit court last week for stealing meat, was asked by Judge Scott if he had any reason why judgment should not be passed upon him, he said that he would not have entered the meat house if he had not been starving. This is a sad commentary upon a land of plenty, and we remember only recently in another part of the State that for the same reason given by the convicted, the humanitarian judge on the bench dismissed the sentence, and said that had it been he, he would have pursued the same course to ward off the pangs of hunger. A comment is to be commended which can discriminate between the necessity of stealing in such an instance and that of stealing from a pure, mean, wantonness.—Campton Rammer.
